

Michael Ninh

AI Engineer · Applied AI · Product Builder

Berlin, Germany · EU / Remote · mikel_ninh@yahoo.de

Portfolio · GitHub · LinkedIn

PROFILE

AI Engineer with a founder/operator background. I turn messy, high-stakes workflows into usable AI products - from legal research and public services to reliable digital workers. I work end to end: understand the problem, build the smallest useful version, test failure modes, and ship.

SELECTED AI & PRODUCT WORK

GitLaw - legal AI platform · live / open source

- Built a searchable system across 5,936 German federal laws with hybrid retrieval and local citation verification; 53/53 citation-resolution evaluation cases pass.
- Built citizen and professional workflows, MCP/API tools and multilingual interfaces while keeping sources, uncertainty and human review visible.

Live · GitHub

Citizen Agents - public-interest AI · active / open source

- Built agents that watch changes in laws, budgets, benefits and courts and turn them into cited, structured, human-reviewable updates.
- Designed the workflow so agents draft and log their work but do not silently take consequential action.

GitHub

Digital Worker Factory - reliable agent systems · working prototype

- Built reusable AI workers with explicit evidence requirements, failure states and human approval before important actions.
- Added a 50-case deterministic synthetic reliability suite running in CI to turn failures into repeatable tests.

GitHub

SafeVoice + PrüfPilot - safety & public-sector workflows

- SafeVoice helps people document online harassment and prepare reviewable evidence; PrüfPilot makes missing evidence and the next human-reviewable step visible in synthetic public-sector cases.

SafeVoice · PrüfPilot

CORE SKILLS

Applied AI

Engineering

Product & Ops

Languages

LLM applications · RAG · AI agents · MCP · structured outputs · evaluations · human-in-the-loop
Python · FastAPI · REST APIs · SQL/PostgreSQL · TypeScript · React · JavaScript · Git/GitHub
Problem framing · rapid prototyping · workflow design · user-centred product thinking · process improvement
German · English · Vietnamese

EXPERIENCE

Founder & E-Commerce Manager - RYUS UG

Sep 2018 - Mar 2025

Berlin

- Built and operated an Amazon e-commerce business across sourcing, logistics, fulfilment, listings and customer support.
- Turned repeatable operational work into clearer processes and developed strong instincts for where automation saves time and prevents errors.

Product Manager / Business Development - everphone GmbH

Jul 2019 - Sep 2020

Berlin

- Scaled omnichannel e-commerce operations across Amazon, eBay, BackMarket, website sales and B2B partners.
- Managed Google Search Ads, tested acquisition channels and used customer and market feedback to refine product positioning.

Service & Operations Manager - Transit Restaurants

Aug 2021 - Sep 2024

Berlin

- Coordinated daily front-of-house operations for 8+ staff serving up to 150 covers per day plus delivery workflows.
- Resolved bottlenecks under peak-service pressure and standardised processes to improve reliability and team communication.

EDUCATION

AI Engineering & Software Engineering - Masterschool Institute of Technology

Oct 2025 - Jun 2026

- Full-stack software engineering with JavaScript, React, Node.js, SQL, REST APIs, Git and GitHub; extended through personal work in LLM applications, RAG and agent systems.

Biomedical Engineering / Mechanical Engineering - TU Berlin

2012 - 2019

Berlin

- Engineering, product development, entrepreneurship, user-centred design and prototype thinking.
